I Opening Remarks

President, International Small Islands Studies Association (ISISA)

On behalf of the International Small Islands Studies Association, I would like to invite you to become part of our island studies family in Jaeundo, Shinan County, South Korea, for our **20th Islands of the World conference, July 7-11, 2026**. What is bound to be one of our most memorable conferences yet will bring together researchers and scholars, practitioners and policymakers, islanders and mainlanders from around the globe to join in the conversation about what matters most to islands and islanders.

And what better place to meet than in Shinan County, which has over 1,000 islands! In this stunning archipelago you'll find a microcosm for island living, where residents grapple with ***"Island space and time,"*** balancing as they do the local and the global. Traditional land- and sea-based economies appear alongside 21st-century tourism and renewable energy projects, while demographic change and climate change play their parts in shaping the future. Various levels of government have been working together to improve accessibility for the county's 38,000 residents as they build bridges between their islands - among them the spectacular 7.2 km Chonseong Bridge which you must cross to get there. You'll know you're getting close when you see the sign "Welcome to Piano Island," demonstrating that culture and identity are alive and well on Jaeun Island, too!

ISISA and the organizers from Institution for Marine & Island Cultures, Shinan-Gun (Local Government), Mokpo National University, and the Korea Islands Foundation look forward to sharing research, policies, and, above all, our stories, celebrating all our "Island space and time" in this collegial gathering. After all, it's in the sharing of ideas and results that we can face the future of our islands with confidence and dynamism that can circle out to the rest of the planet - which, of course, is an island, too.

We look forward to seeing you in Jaeundo in July!

Laurie Brinklow, BA, MA(IS), PhD, OPEI

President, International Small Islands Studies Association (ISISA)

Assistant Professor, Island Studies

University of Prince Edward Island, Charlottetown, PEI, Canada

Welcome Remarks

Mayor, Shinan County

Distinguished scholars and experts on island studies from Korea and around the world, Esteemed representatives of the International Small Islands Studies Association (ISISA), Honored guests, I am Taesung Kim, Mayor of Shinan County. It is a great honor to host the 20th Islands of the World Conference here in Shinan, the largest archipelagic county in the Republic of Korea. I extend my warmest welcome and sincere appreciation to all of you for joining us on this meaningful occasion.

First of all, I would like to extend my warmest welcome and sincere appreciation to ISISA President Laurie Brinklow, ISISA Vice President Sarah Nimführ, Professor Stefano Moncada, and Professor Huei-Min Tsai for joining us at the 2026 ISISA Conference. I would also like to express my sincere gratitude to Vice Mayor for Administrative Affairs Ki yeon Hwang of the Jeonnam-Gwangju Special Metropolitan City, President Ha-Cheol Song of Mokpo National University, Director Jinyoung Park of the Honam National Institute of Biological Resources, President Seonghwan Cho of the Korea Island Development Institute, Chair of the Organizing Committee Sun-Kee Hong, and all the distinguished guests and participants for honoring us with their presence. Under the theme "Islands: Space and Time," this year's conference brings together distinguished researchers and policy experts from across the globe to examine the present realities of islands and explore pathways for their future. It is a truly significant opportunity for dialogue and collaboration. For many years, islands were regarded as places set apart from the mainland. Today, however, they are increasingly recognized as vital spaces for addressing some of the world's most pressing challenges, including climate change, biodiversity conservation, and sustainable regional development. More importantly, islands embody a way of life where nature, culture, people, and communities coexist in harmony. They offer enduring values that can help guide humanity toward a more sustainable future.

Shinan County, home to 1,028 islands, vast tidal flats, and a rich cultural heritage, is one of Korea's foremost island regions. While preserving its remarkable ecological and cultural assets, including the Shinan Tidal Flats, a UNESCO World Heritage Site, the County has pursued sustainable island policies that enable both local communities and the natural environment to thrive together. In particular, Shinan has been creating new opportunities for island development through environmentally responsible energy initiatives and community-driven development models. We believe these experiences are valuable assets that should be shared and further advanced in partnership with island communities around the world. I hope this conference will serve not only as a forum for sharing academic achievements, but also as an opportunity to address the diverse challenges facing islands and to strengthen international cooperation and solidarity. May the knowledge and experiences exchanged here inspire meaningful policies and practical actions in every country, laying a strong foundation for a more sustainable future for islands worldwide. Thank you.

Taesung Kim

Mayor of Shinan County

Welcome Remarks

Chair, Local Organizing Committee for the 20th ISISA Islands of the World Conference

Distinguished ISISA members, island researchers and policy experts from around the world, and honored guests, I warmly welcome you all.

I have the honor of serving as Chair of the Local Organizing Committee for the 20th ISISA Islands of the World Conference. First, I would like to express my sincere gratitude to everyone attending this conference here on Jaeun Island, Shinan-gun, Republic of Korea. I extend a special welcome to all researchers who have traveled from many countries to join us here in Shinan.

The theme of this year's conference is "Island Space and Time." This theme invites us to understand islands not merely as geographical spaces, but as complex living places shaped over time by nature and culture, society and history, ecology and technology. Islands may appear isolated, yet they have long been connected to the world through the sea. They are also places where global changes such as the climate crisis, ecological transition, and regional decline are revealed most clearly and urgently. Shinan gives special meaning to this conference. It is a living biocultural landscape where the archipelago, tidal flats, fisheries, food culture, and island village communities are closely intertwined. The tidal flats of Shinan, recognized as part of a UNESCO World Natural Heritage site, are not merely ecological spaces. They are precious social-ecological heritage formed through the long interaction between humans and nature.

This conference covers a wide range of themes, including governance and policy, economy and population, tourism and mobility, environment and biocultural systems, arts and cultural heritage, infrastructure and technology, and the theories and methodologies of island studies. Ultimately, all these discussions lead to one essential question: How can islands create sustainable futures in the age of climate crisis and ocean transition?

At this moment, I would also like to express my special appreciation to everyone who has worked so hard to prepare this conference. This international conference has been made possible thanks to the dedication of the officials and staff of Shinan-gun, the island residents, the professors and researchers of the Institution for Marine and Island Cultures at Mokpo National University, the members of the Organizing Committee, volunteers, booth participants, interpreters, and students.

In the 21st century, islands are no longer peripheral spaces. They are among the most advanced places for understanding the climate crisis, conserving biocultural diversity, and experimenting with new ways of life in which humans and nature coexist. I sincerely hope that this conference will become a new starting point for Korean island studies, island policy, and the maritime future of the Republic of Korea. Once again, I warmly welcome you all.

Thank you very much.

Sun-Kee Hong

Chair of the Local Organizing Committee for the 20th ISISA Islands of the World Conference

Congratulatory Remarks

Vice Mayor for Administrative Affairs, Jeonnam-Gwangju Special Metropolitan City

Welcome Remarks. Vice Mayor for Administrative Affairs, Jeonnam-Gwangju Special Metropolitan City

On behalf of the citizens of the Jeonnam-Gwangju Special Metropolitan City, I extend my heartfelt congratulations on the opening of the 20th Islands of the World Conference in the beautiful "1004 Islands" of Shinan County. I would like to express my sincere appreciation to ISISA President Laurie Brinklow, the Organizing Committee of the 20th Islands of the World Conference, and Taesung Kim, Mayor of Shinan County, for their dedicated efforts in preparing this meaningful international academic event. I also extend my gratitude to the distinguished island scholars, researchers, policymakers, honored guests from Korea and abroad, and the residents of Shinan County who have gathered here to discuss the sustainable future of islands.

Today, islands around the world face a complex set of challenges, including climate change, sea level rise, ecosystem transformation, and population decline. Addressing these issues requires the sharing of knowledge and experience surrounding islands, as well as close collaboration across the international community.

The 20th Islands of the World Conference provides a valuable platform where island researchers and policymakers from around the globe come together to assess the current realities facing islands and explore pathways toward a more sustainable future. Islands are no longer the periphery or the farthest reaches of the mainland. Rich in unique ecosystems, cultural heritage, history, and generations of lived wisdom, islands represent new opportunities in the era of climate change and serve as vital starting points for the future of our maritime civilization.

The Jeonnam-Gwangju Special Metropolitan City remains committed to preserving the intrinsic value of islands while promoting sustainable island development that enhances both the quality of life for island communities and the vitality of local regions. In particular, through the 2026 World Island Exhibition Yeosu Korea, we look forward to sharing the value of islands and our vision for their future with the global community.

I hope this conference will serve as an important opportunity to exchange the wisdom and experiences of island communities worldwide, while opening new horizons for island policy and international cooperation.

Once again, I sincerely congratulate you on the opening of the 20th Islands of the World Conference, and I wish all participants good health, happiness, and every success. Thank you.

Ki yeon Hwang

Vice Mayor for Administrative Affairs Jeonnam-Gwangju Special Metropolitan City

I Congratulatory Remarks

President, Mokpo National University

Distinguished President Laurie Brinklow of ISISA, esteemed ISISA members, distinguished scholars and experts in island studies from around the world, honored guests, ladies and gentlemen,

On behalf of Mokpo National University, I am deeply honored to offer my congratulatory remarks on the opening of the 20th ISISA Islands of the World Conference here on Jaeun Island, Shinan-gun, Jeollanam-do, Republic of Korea.

For Mokpo National University, this conference is more than an international academic gathering. It is a meaningful occasion that connects our university's long-standing commitment to marine and island studies with the global community of island researchers. It is also a valuable opportunity for the world to encounter the ecological, cultural, and academic significance of Korea's southwestern archipelago.

It is especially meaningful that scholars, policy experts, and practitioners from many parts of the world have gathered here in Shinan to share knowledge and explore the sustainable future of islands. I want to extend my sincere congratulations and appreciation to ISISA President Dr. Laurie Brinklow and all members of ISISA for making this important gathering possible.

The theme of this conference, "Island Space and Time," presents a new perspective on how we understand islands today. Islands can no longer be explained only as spaces of isolation or underdevelopment. Today, islands are receiving growing attention as strategic spaces that serve as bases of maritime territory, starting points for regional innovation, and places where education and research, industry and culture can come together to create new engines of growth.

Amid these changes, Mokpo National University is developing as a marine-specialized university grounded in the geographical, ecological, and cultural values of the southwestern sea and the Korean archipelago. In particular, building on the achievements of the 'Glocal University Project' and the 'RISE initiative', we are laying the foundation for shared growth between the university and the region. We are also strengthening our role as a center for education, research, industry-university cooperation, and international exchange for the sustainable development of islands and the ocean.

Our university will continue to advance its accumulated research capacity in the fields of naval architecture and ocean engineering, marine and fisheries sciences, and energy. At the same time, in response to the future industrial needs of the southwestern sea region and national strategic priorities, we are expanding the scope of education and research into AI, semiconductors, and medical fields. Through these efforts, Mokpo National University is steadily building the foundation to grow beyond a regionally specialized university into a leading global university that connects the region with the world.

I believe that islands are a vital starting point for opening the future of the sea. The Republic of Korea is a maritime nation with more than 3,400 islands. These islands are not merely geographical assets; they are bases of maritime territory and frontiers for future marine industries and regional innovation. I hope that this World Islands Conference will provide a meaningful opportunity to suggest new directions for Korea's Island policies and to explore a shared vision for the future of marine industries and education.

In particular, Shinan is a world-class field for island studies, with its UNESCO World Natural Heritage tidal flats, numerous islands, rich marine ecosystems, and cultural diversity. The gathering of island researchers from around the world here in Shinan to discuss the sustainable development and future vision of islands is of great significance in enhancing the international standing of Korean island studies.

Finally, I would like to express my sincere gratitude to ISISA President Dr. Laurie Brinklow and the ISISA committee members, the officials of Shinan-gun, the Jeonnam-Gwangju Special Metropolitan City, the Institution for Marine and Island Cultures at Mokpo National University, the Korea Island Foundation, and all members of the Conference Organizing Committee for their dedicated efforts in preparing this conference. I also extend my appreciation to the people of Shinan-gun and the island residents for their warm hospitality toward all participants.

I sincerely hope that the 20th ISISA Islands of the World Conference will open a new horizon for Korean island studies and sustainable development, and that it will serve as an important milestone for Mokpo National University as it advances toward becoming a marine-specialized global university connecting the region and the world.

Once again, I offer my heartfelt congratulations on the opening of this conference. I wish all participants good health, happiness, and great success throughout the conference.

Conference Overview

TITLE	20 th Islands of the World Conference (2026 ISISA) 제20회 2026 세계섬학술대회
DATE	7(Tue)-11(Sat) July 2026
CONFERENCE THEME	Island Space and Time
CONFERENCE LOCATION & VENUE	Ramada Plaza & C-ONE Resort Jaeundo, Shinan County, South Korea

Shinan County consists of an archipelago of hundreds of islands off the coast of the port city of Mokpo, South Korea. Shinan is important for Korea's biocultural diversity, with its rugged mountains, nutrient-rich tidal flats, and shimmering waters giving rise to traditional fishing, aquaculture, agriculture, and salt industries, more recently complemented by tourism and renewable energy production. However, with just around 38,000 residents, and facing persistent problems with aging and small island depopulation, Shinan is experiencing challenges familiar to many other small island communities worldwide.

Islands exist across both space and time, serving as places where tradition and innovation coexist. They preserve cultural heritage while also fostering new ideas, technologies, and ways of living. As climate change, environmental disruption, and globalization reshape island communities, islands face unique challenges and opportunities related to resilience, identity, sustainability, and development. At the same time, their distinctive biocultural systems, cultural traditions, and connections between land and sea provide valuable insights for addressing contemporary social and environmental issues.

The 20th Islands of the World Conference, held in Shinan County, South Korea, explores these issues and more across the full range of islands and archipelagos. This multidisciplinary conference is open to academic, policy, and artistic approaches to the conference theme as well as to other aspects of islands, archipelagos, and islandness.

The Dynamics of Island Time-Spaces: Lessons from Indigenous Co-evolutionary Cosmologies

Huei-Min Tsai

Professor,
National Taiwan Normal University (NTNU), Taiwan

Huei-Min Tsai is a retired Professor of Sustainability Management and Environmental Education at National Taiwan Normal University (NTNU) and an Honorary Researcher at NTNU's Center for Indigenous Research and Development. She holds a Ph.D. in Geography from National Taiwan University, a M.Sc. from The Ohio State University, U.S.A. and a B.Sc. in Biology from NTNU. Her research focuses on small island studies, biocultural diversity, social-ecological systems, sustainability sciences, and local & Indigenous knowledge systems. She currently serves as a member (and former Chair) of the Advisory Board of the International Geographical Union's Commission on Islands (IGU-Islands), an Honorary Life Member of the International Small Islands Studies Association (ISISA), and a committee member of the National Committee of Future Earth, Academia Sinica (Future Earth-Taipei), as well as on other academic review boards.

“You Know You Live on an Island When...”: Bridging Islands in the 21st Century

Laurie Brinklow

Assistant Professor,
University of Prince Edward Island, Canada

Dr. Laurie Brinklow is an Assistant Professor of Island Studies and Coordinator of the Master of Arts in Island Studies program / Chair of the Institute of Island Studies at the University of Prince Edward Island in Charlottetown, Canada. There she facilitates and supports research on sustainable communities on islands around the world, teaches Island Studies, and supervises graduate students. She is President of the International Small Island Studies Association, Iceland’s Honorary Consul to Prince Edward Island, and is a recipient of the Order of Prince Edward Island. Author of the poetry book *My island's the house I sleep in at night* (Island Studies Press, 2022), she is the co-editor (with Andrew Jennings) of *The Bridge Effect: Critical Reflections in the Age of Technological Solutionism* (Island Studies Press, 2024) and co-editor (with Jean Mitchell et al.) of *Turning the Tide: Climate Change, Social Change, and Islandness* (Island Studies Press, 2026).

Explore Jaeun Island

Where Nature, Heritage, and Island Time Converge

Welcome to Jaeundo, one of the largest islands in Sinan County's renowned "1004 Islands" archipelago. Known for its pristine beaches, coastal landscapes, and rich island heritage, Jaeundo offers visitors a unique opportunity to experience the natural beauty and culture of Korea's southwestern coast. During your stay, we invite you to explore some of the island's most distinctive attractions.

- **Muhanui Bridge (무한의 다리)**

Muhanui Bridge is a scenic pedestrian bridge offering panoramic views of the coastline and surrounding waters. A walk across the bridge provides a unique opportunity to appreciate the coastal landscape of Jaeundo, particularly at sunset.

- **Boongye Beach (분계 해변)**

Surrounded by a beautiful coastal pine forest, Boongye Beach is known for its wide sandy shoreline, tranquil atmosphere, and crystal-clear waters. It offers a peaceful setting for seaside walks, relaxation, and enjoying Jaeundo's natural beauty.

- **Yeoinsong Pine Forest (여인송 숲)**

Situated near Baekgil Beach, Yeoinsong Pine Forest is famous for its distinctive pine trees shaped by decades of sea winds. The forest trails provide a serene setting to experience the island's natural beauty.

- **Jaeundo Sunsets**

Jaeundo is renowned for its breathtaking sunsets, where the golden light reflects across the sea and surrounding islands. The island's peaceful coastal scenery creates one of the most memorable sunset experiences in Shinan.

- **Local Cuisine**

Jaeundo offers a variety of fresh seafood and regional specialties that reflect the rich maritime heritage of Shinan. Be sure to experience the local cuisine and seasonal delicacies during your stay.

We hope your visit to Jaeundo will be both enjoyable and memorable, complementing your experience at the conference.

Useful Information

Climate & Weather

July in Shinan is typically warm and humid, with daytime temperatures generally ranging from the mid-20s to low 30s°C. As this period coincides with Korea's summer season, visitors may experience a mix of sunshine, cloud cover, and occasional rain showers.

Light clothing is recommended, along with a hat, sunscreen, and an umbrella for outdoor activities.

Electricity

The standard voltage in Korea is 220V at 60Hz. Electrical outlets use two round-pin plugs.

Internet

Free Wi-Fi is available throughout the hotel and resort.

Korean Currency

The official currency of Korea is the Korean won (KRW). Credit cards are widely accepted, but carrying a small amount of cash is recommended for convenience.

For the latest exchange rates, please visit XE Currency Converter: www.xe.com.

Credit Card

Major international credit cards, including Visa and Mastercard, are widely accepted at hotels, restaurants, shops, and other commercial establishments.

Most businesses display signs indicating the credit cards they accept.

Useful Phone Numbers

[Emergency Assistance]

Should you find yourself in an emergency, dial **112 for police** assistance, **119 for fire** and ambulance services. Please note that most operators speak Korean only. Hotel staff can assist you in contacting a doctor or arranging ambulance services if needed.

For language assistance, the **Travel Hotline (1330)** provides 24-hour support for international visitors. Bilingual operators are available to offer travel information and interpretation assistance in English.

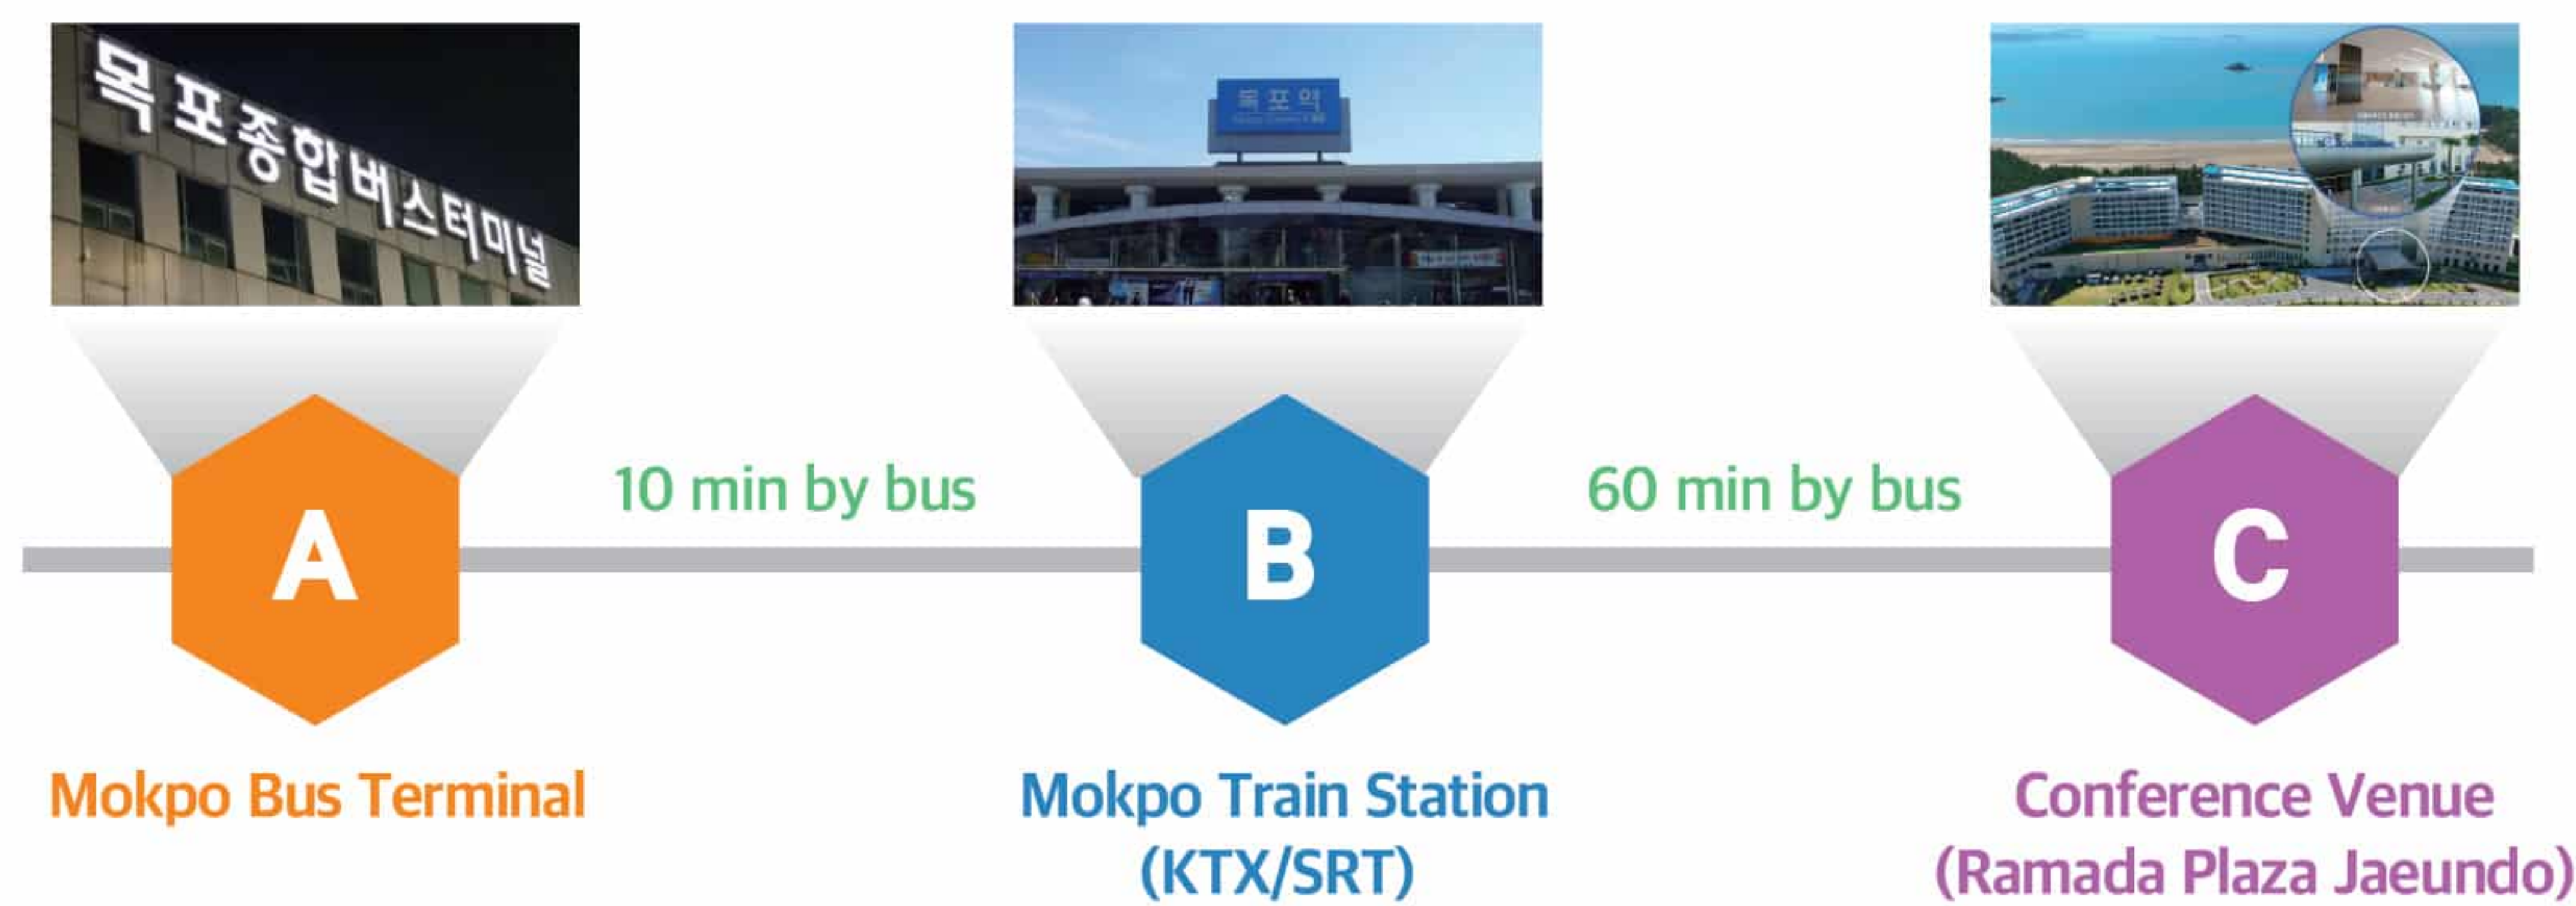

[BBB Interpretation Service]

For language assistance, dial **1588-5644** and select your preferred language. A volunteer interpreter will assist you 24 hours a day. The service is also available through the **bbb Korea mobile app**.
